	SCP	1
	6	1
	9	1
	10	1
	12	5
ride to nowhere		2
	13	1

05/05/2020 Rather cooler and very windy so less Wood Whites
I used transect System of recording to avoid double counting.
Only 5 Wood Whites found but did find a mating pair

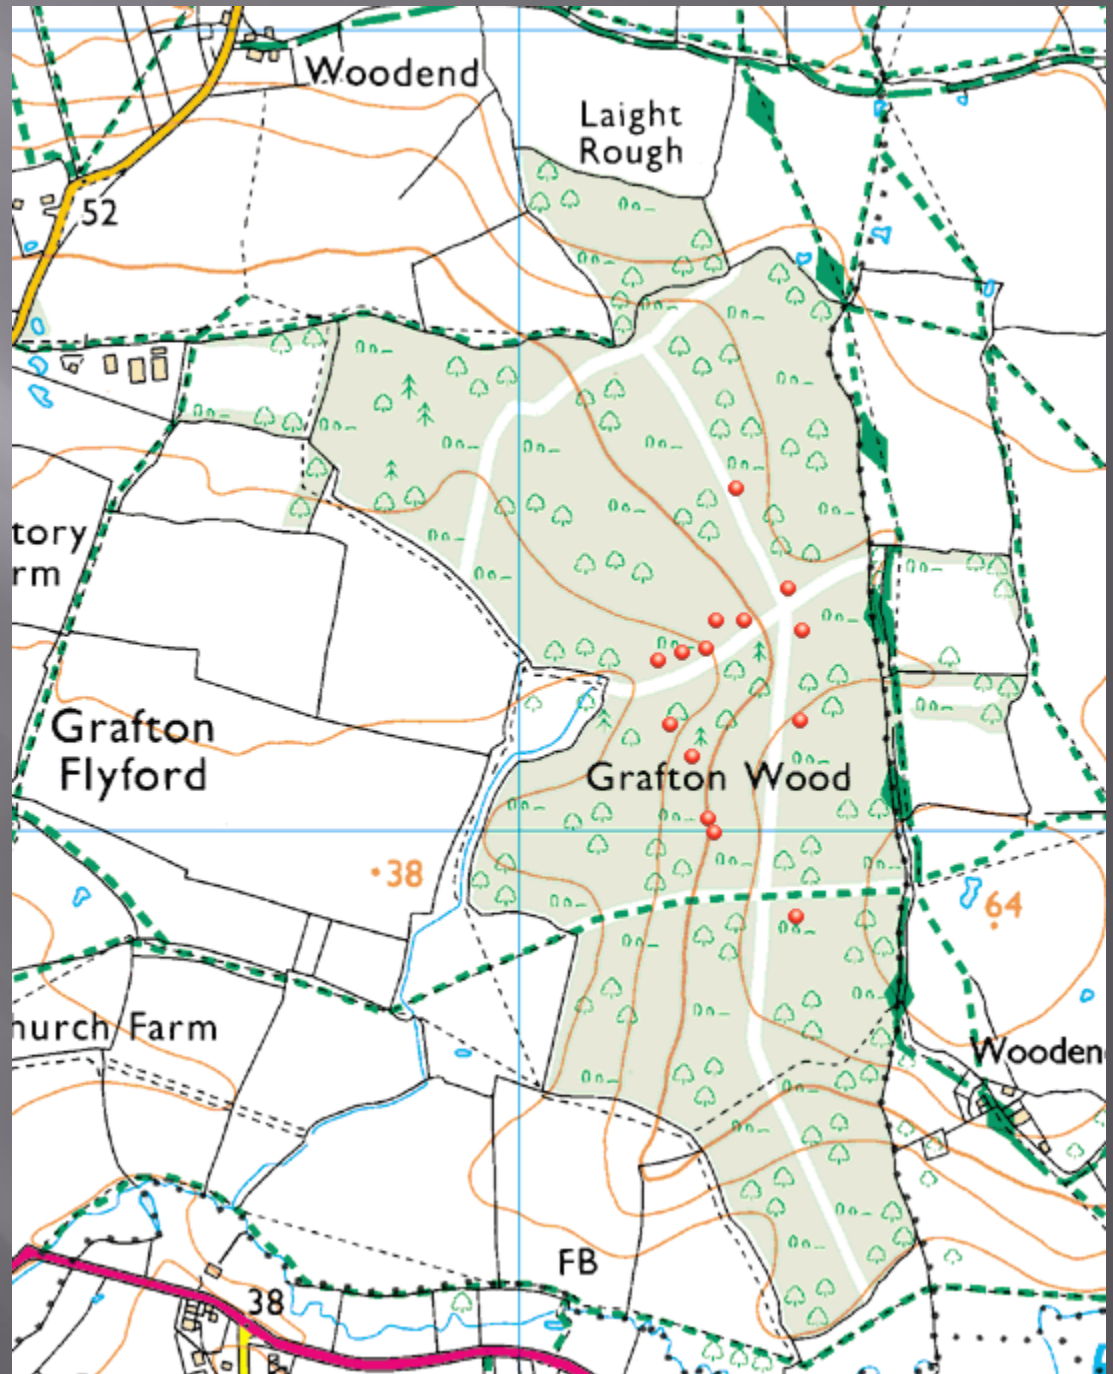

Wood Whites
07/05/2020

14 Mostly Males

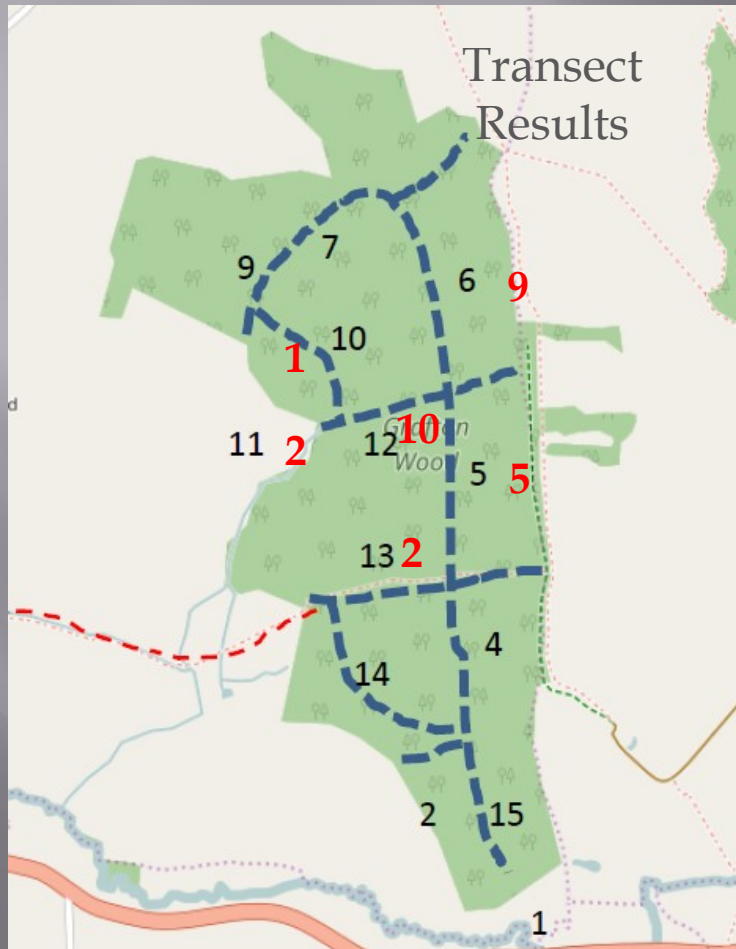

Sunday 9th May – 18 to 20 Wood Whites still mostly males

Wood White Report 21/05/2020

Transect Results: Wood Whites – 29 Using Transect methodology

Trev' T did a detailed search on the same day including the areas of ex-conifer plots which are not on the Transect.

The Total count was 40
Half of these were females – some display and egg-laying was observed.

Egg on Greater
Birds-foot Trefoil

Egg on Meadow
Vetchling

Hunting for Eggs

Wood White 14/06/2020

Full Count 13

22/05/2020 Trans 11

29th June Lucy B found first instar Larva
After marking the eggs with a stick

The egg is pale yellow

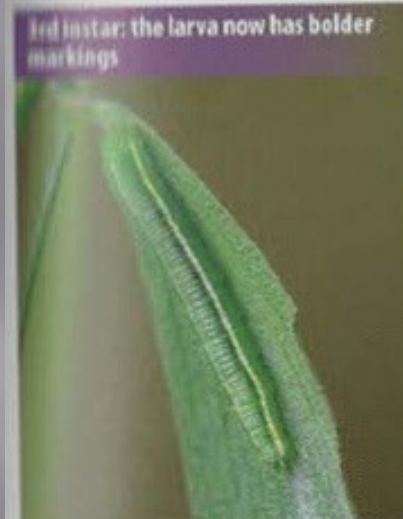

Eggs may have a slight curve to one side

1st instar: the ground colour is pale yellow

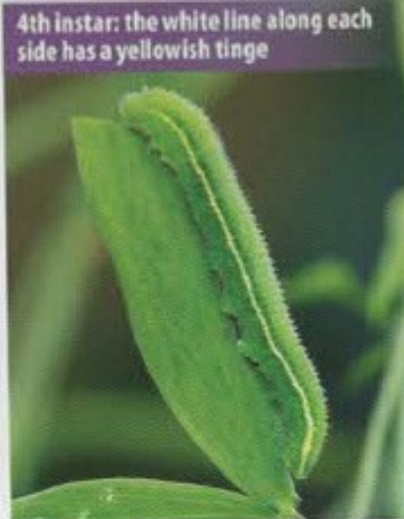

2nd instar: the larva now has a pale line at the base of each side

3rd instar: the larva now has bolder markings

4th instar: the white line along each side has a yellowish tinge

4th instar: a pre-pupation larva

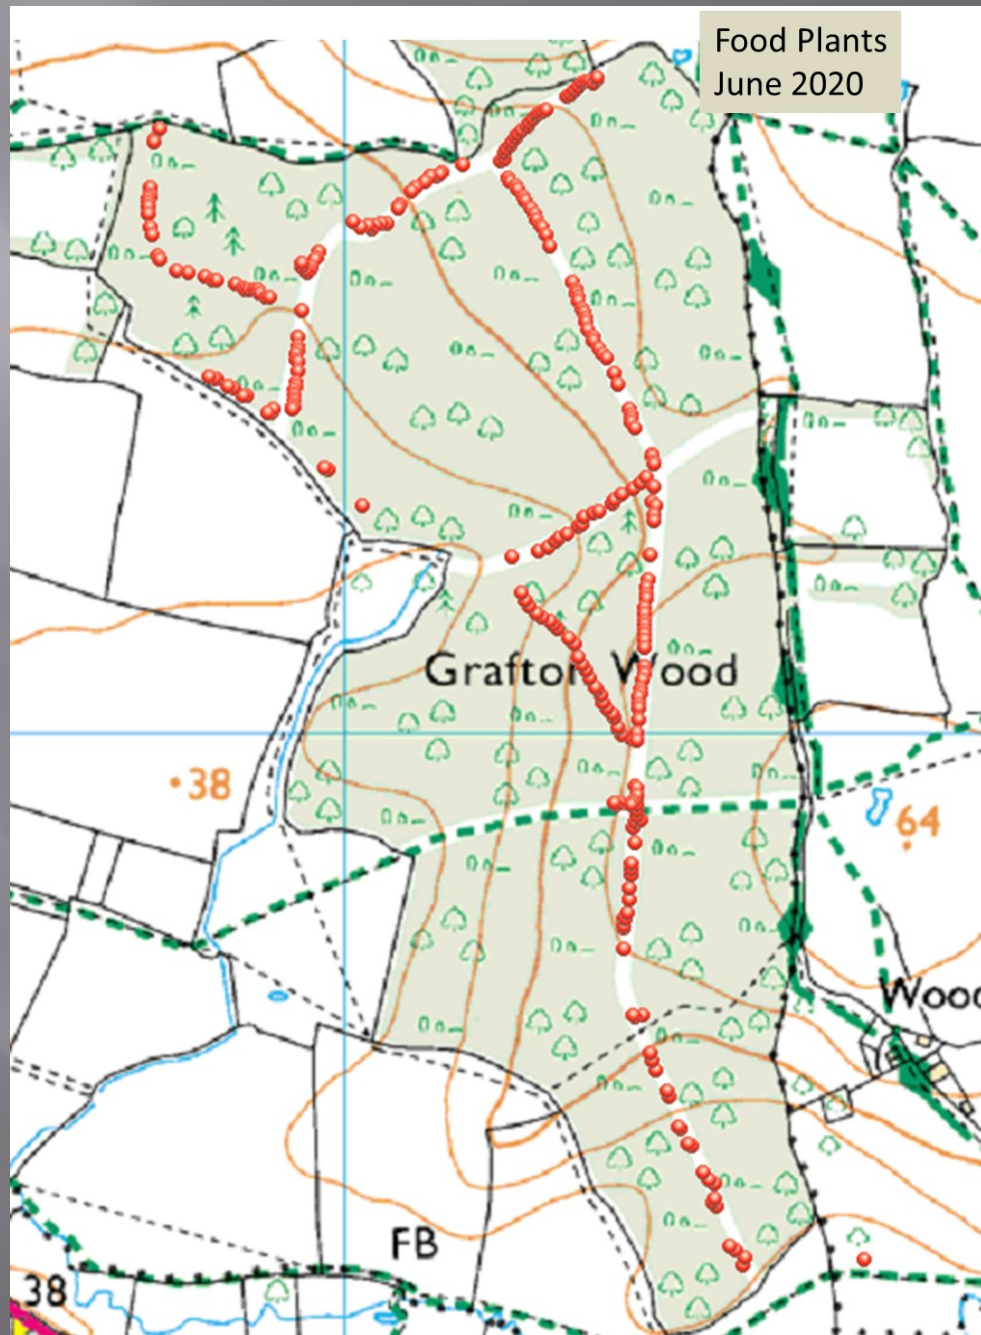

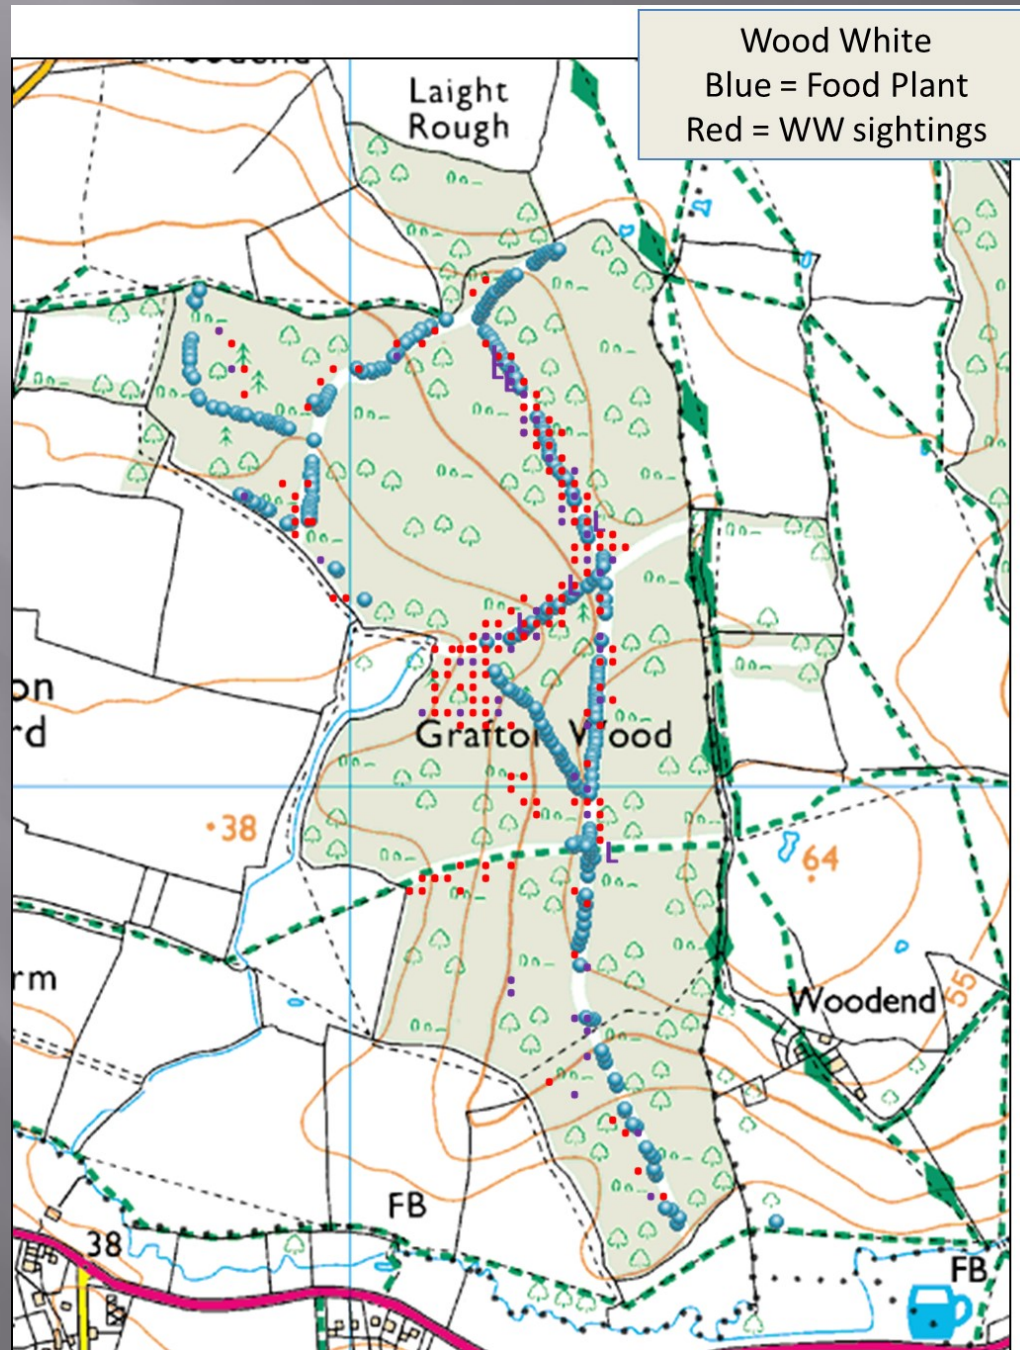

The pupa is adorned with beautiful pink markings

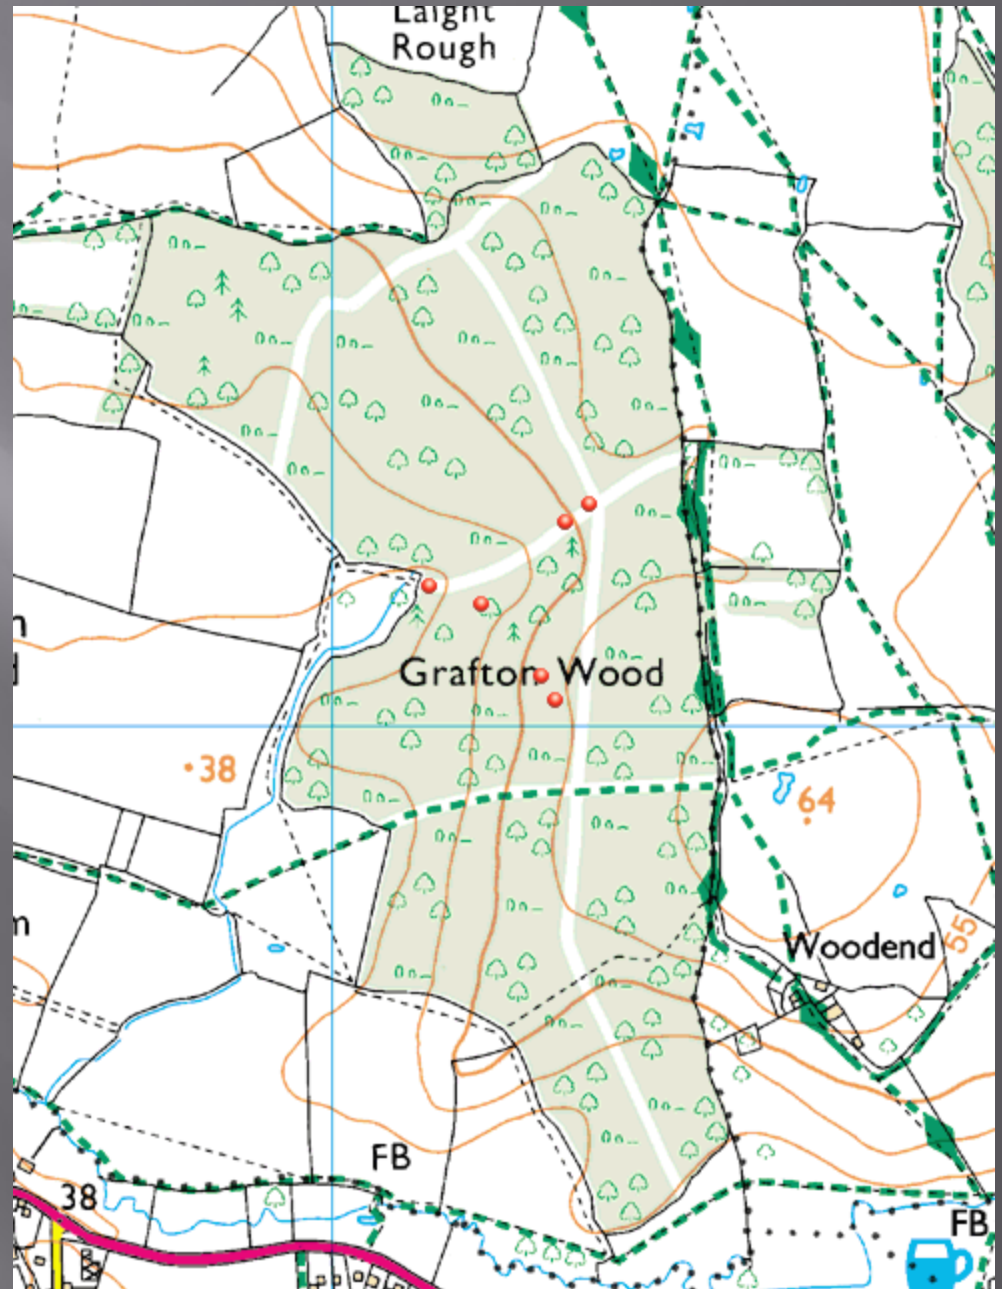

A pupa one hour before the adult emerged
